1. KEY ACHIEVEMENTS AND CORE EXPERTISE

20+ years of software engineering experience in enterprise software development; Experience with **CI/CD pipelines and DevOps practices**; Led development teams, mentored engineers, and drove technical excellence across multiple enterprise projects; Experience with pure **Java**, **Spring & Springboot, RESTful APIs**; Designed and developed cloud-native platforms based on **Docker**, **Kubernetes**, and **Helm**; Experience with **AWS** and managed Kubernetes solution (**EKS**); Extensive experience in backend architecture, distributed systems, **microservices**, and workflow orchestration; Experience in designing, building, and maintaining high-scale server-side applications; Usage of AI (**Cursor AI, Copilot AI: IDE** and cmd mode) for coding, testing and troubleshooting solving; Working on **Agile / Scrum** project management framework; Successfully collaborated with customers, architects, and product teams to transform business requirements into scalable technical solutions.

2. PROFESSIONAL EXPERIENCE

2.1 Amdocs Ltd. – Ra'anana, Israel
Backend Software Architect | Technical Leader | Solution Designer | Technical Expert | Team Leader
June 2000 – June 2026
More than 26 years designing, developing, and delivering enterprise-scale telecommunications software, progressing from C++ developer to Technical Expert, Solution Designer, Backend Architect, and Team Leader.

Areas of responsibility included:
* Enterprise backend architecture and system design; Design reviews and code reviews
* Java, Spring & Springboot, RESTful APIs, API design and system integration;
* Distributed systems and cloud-native applications
* Kubernetes and Docker migration
* Technical leadership and mentoring
* CI/CD pipelines and DevOps practices;
* Customer-facing solution design, Production support for enterprise systems
* Agile software development

2.1.1 Senior Engineer / Technical Expert / Solution Designer
Project: **Network Workflow Orchestration (NWO)**

August 2020 – June 2026
Designed the overall backend architecture for cloud-native orchestration services; Defined service boundaries, APIs, and integration patterns for distributed applications; Led migration from legacy deployment architecture to Kubernetes and Helm; Designed scalable microservice-based backend services; Evaluated technologies and contributed to architectural decisions; Participated in architecture reviews, technical design reviews, and code reviews; Mentored developers and promoted engineering best practices; Collaborated with product managers, architects, and customer representatives to deliver scalable enterprise solutions; Solved complex production issues affecting customer deployments; Usage AI in coding, testing and troubleshooting process

Technologies: Java, Spring Boot, Kubernetes, Docker, Helm, REST APIs, Oracle, Cassandra, Elasticsearch, Git, CI/CD pipelines and DevOps practices

2.1.2 Senior Engineer / Technical Expert / Solution Designer
Project: **Network Cloud Service Orchestration (NCSO) & Virtual Network Functions (VNF)**

May 2014 – July 2020
Designed distributed backend architecture for end-to-end network orchestration; Defined APIs and integration points between orchestration services; Designed reusable frameworks based on Docker and cloud-native principles; Developed workflow orchestration and cloud integration services; Participated in technology evaluation and architectural decision-making; Reviewed technical designs and implementation approaches; Worked closely with architects, product managers, and customer representatives; Participated in production deployments and customer integration projects.

Technologies: Java, Spring Boot, Docker, Cloud Services, Workflow Engines, REST APIs

2.1.3 Senior Engineer / Solution Designer / Team Leader
Project: **Service Order Management (SOM), SmallSell & CRM Navigator**

September 2003 – May 2014
* Designed core backend architecture and enterprise business services.
* Defined component interfaces and service interactions.
* Led software development teams and coordinated QA activities.
* Conducted architecture discussions, design reviews, and code reviews.
* Mentored software engineers and junior developers.
* Worked directly with customer representatives to analyze business requirements and define technical solutions.
* Led Scrum planning and coordinated development activities.
* Drove architectural improvements across multiple product releases.

Technologies: Java, Spring Framework, Oracle, Enterprise CRM Platforms

2.1.4 Software Engineer
Project: **Dynamic Application Framework (DAF) & Amdocs CRM**

June 2000 – August 2003
* Developed enterprise software using C++ and COM technologies.
* Implemented reusable framework components.
* Resolved complex production issues.
* Participated in customer onboarding and pilot deployments.
* Transitioned from C++ development to enterprise Java backend development.

Technologies: C++, COM, Java

3. EDUCATION
3.1
Master's Degree (M.Sc. equivalent)
Marine Machinery & Mechanical Engineering
Marine University, Odessa, Ukraine
1988
3.2
Microsoft Network System Administrator
KamTech Colledge
Tel Aviv, Israel
2000

4. TECHNICAL SKILLS

Architecture & Design
Enterprise Backend Architecture; Distributed Systems; Microservices; System Integration; Workflow Orchestration; Cloud-Native Architecture; Solution Design; Design Patterns; Object-Oriented Design; CI/CD pipeline

Programming Languages
Java, Python, C/C++, SQL

Frameworks & Technologies
Spring Boot, Spring Framework; RESTful Services; Docker, Kubernetes, Helm; OpenAPI / Swagger;
Cloud & DevOps
* AWS, Docker, Kubernetes, Helm, Git, CI/CD, Linux

Databases
* Oracle, PostgreSQL, MySQL, Cassandra, Elasticsearch

Development Practices
Agile / Scrum; Technical Design Reviews; Code Reviews; Technical Mentoring; Performance Optimization; Production Troubleshooting

AI-Assisted Development
ChatGPT; GitHub Copilot; Cursor; AI-assisted Software Development

LANGUAGES
* Russian — Native
* Hebrew — Fluent
* English — Professional Working Proficiency
